Subject: Permanently Stop Pesticide Use - cancer and disease risk

Attention: This email originated from outside the County of Orange. Use caution when opening attachments or links.

Dear OC Supervisors,

I am a mom who lives in Rancho Mission Viejo and a cancer survivor. It is extremely disturbing to me that pesticides are/were being sprayed into the creek right next to where we live. Please permanently stop using pesticides in our water sources and around where my toddler lives and is growing up. Please consider the concerns and pleas of the vulnerable citizens of this community who have gotten sick and are getting sick by the day due to the toxins in the environment around us. There is currently a cancer cluster investigation going on in Ladera Ranch, including an alarming number of childhood cancer cases. Orange County also has a very high cancer rate compared to the rest of the country. You have the ability to stop using these chemical toxins into our water - please put a permanent stop to this practice.

Thank you for your time and consideration.

Sincerely,
Deborah Lee
