Subject: Vote YES on Item S10A (Phasing Out Pesticide Use in County Waterways)

Attention: This email originated from outside the County of Orange. Use caution when opening attachments or links.

Dear Members of the Orange County Board of Supervisors, I am writing in strong support of Agenda Item S10A, which includes directing the County to develop a formal plan to phase out herbicide use, requiring public notification of any herbicide application during the transition period, and other items that improve the accountability and compliance of the County with regulatory agencies. Pesticides and herbicides applied to waterways can harm or kill non-target organisms such as fish, amphibians, native plants, and aquatic invertebrates, disrupting food webs and degrading healthy ecosystems. Human exposure to certain pesticides has also been associated with serious health concerns, including cancer, neurological effects, and developmental problems, particularly for communities living near areas with frequent pesticide use. I respectfully urge the Board of Supervisors to support this agenda item and move forward with a plan to phase out pesticide use in county waterways. Doing so will allow the County to identify the most effective, environmentally responsible, and sustainable path forward for managing waterways while protecting public health, wildlife, and water quality for future generations. Sincerely, [Suzanne Feighery Fullerton 92831

Orange County Board of Supervisors

RE: Agenda Item S10A – Support for a YES Vote

Dear Chair and Members of the Board of Supervisors,

I respectfully urge you to vote YES on Agenda Item S10A.

This item represents an important opportunity for Orange County to take a thoughtful and responsible approach toward modernizing vegetation management practices and evaluating alternatives to herbicide use. A YES vote does not predetermine an outcome; rather, it allows County staff the time and resources necessary to conduct the due diligence, research, and analysis needed to identify the most effective and environmentally responsible path forward.

Many counties throughout California, including Los Angeles County and San Diego County, have already begun modernizing their land management practices and exploring approaches that better align with the requirements and intent of the California Endangered Species Act (CESA) and the Federal Endangered Species Act (ESA). Orange County deserves the same opportunity to evaluate current practices, review emerging science, and consider alternatives that may better protect sensitive habitats, waterways, wildlife, and public health.

A YES vote on S10A is a vote for knowledge, transparency, science and informed decision-making. It gives our County the ability to fully examine the best available options, assess costs

and benefits, and develop strategies that reflect modern environmental stewardship while continuing to meet operational needs.

Our residents deserve a County government that is willing to learn, adapt, and pursue continuous improvement. By supporting this item, you will empower staff to gather the information necessary to help Orange County do better and be better for future generations.

Thank you for your consideration and your service to our community.

Sincerely,

Aurora Vilchis

As we come to understand just how seriously we have damaged California's natural environment thru some vision of landscaping or control, we need to start acting in a different way while it's still possible to save and support the web of flora and fauna that once existed. Agenda S10A is a solid step in that direction. Let's stop putting poisons of any kind into the environment we are part of. Let's give ourselves a chance at healthy natural surroundings while there is still time. Nature is resilient. Lets look at our landscape in a smarter way.

June 2026

Orange County Board of Supervisors

RE: Agenda Item S10A – Support for a YES Vote

Dear Chair and Members of the Board of Supervisors,

I respectfully urge you to vote YES on Agenda Item S10A.

This item represents an important opportunity for Orange County to take a thoughtful and responsible approach toward modernizing vegetation management practices and evaluating alternatives to herbicide use. A YES vote does not predetermine an outcome; rather, it allows County staff the time and resources necessary to conduct the due diligence, research, and analysis needed to identify the most effective and environmentally responsible path forward.

Many counties throughout California, including Los Angeles County and San Diego County, have already begun modernizing their land management practices and exploring approaches that better align with the requirements and intent of the California Endangered Species Act (CESA) and the Federal Endangered Species Act (ESA). Orange County deserves the same opportunity to evaluate current practices, review emerging science, and consider alternatives that may better protect sensitive habitats, waterways, wildlife, and public health.

A YES vote on S10A is a vote for knowledge, transparency, science and informed decision-making. It gives our County the ability to fully examine the best available options, assess costs

and benefits, and develop strategies that reflect modern environmental stewardship while continuing to meet operational needs.

Our residents deserve a County government that is willing to learn, adapt, and pursue continuous improvement. By supporting this item, you will empower staff to gather the information necessary to help Orange County do better and be better for future generations.

Thank you for your consideration and your service to our community.

Sincerely,

Ann Larson

Attention: This email originated from outside the County of Orange. Use caution when opening attachments or links.

Dear Members of the Orange County Board of Supervisors,

I am writing to express my strong support for Agenda Item S10A. This item appropriately directs the County to develop a formal plan to phase out herbicide use, requires public notification of any herbicide applications during the transition period, and includes measures to improve accountability and regulatory compliance.

Pesticides and herbicides applied to waterways can harm non-target organisms—such as fish, amphibians, native plants, and aquatic invertebrates—which disrupts food webs and degrades ecosystems. Furthermore, human exposure to certain pesticides is associated with serious health concerns, including cancer and neurological or developmental issues, particularly for communities near treated areas.

I respectfully urge the Board of Supervisors to support this agenda item and proceed with a plan to phase out pesticide use in county waterways. This initiative will enable the County to identify sustainable, environmentally responsible methods for managing our waterways while protecting public health, wildlife, and water quality.

Sincerely,

Ken Granucci, San Clemente, CA

Subject: Vote YES on Item S10A (Phasing Out Pesticide Use in County Waterways)

Attention: This email originated from outside the County of Orange. Use caution when opening attachments or links.

Dear Members of the Orange County Board of Supervisors,

I am writing in strong support of Agenda Item S10A, which includes directing the County to develop a formal plan to phase out herbicide use, requiring public notification of any herbicide application during the transition period, and other items that improve the accountability and compliance of the County with regulatory agencies.

Pesticides and herbicides applied to waterways can harm or kill non-target organisms such as fish, amphibians, native plants, and aquatic invertebrates, disrupting food webs and degrading healthy ecosystems. Human exposure to certain pesticides has also been associated with serious health concerns, including cancer, neurological effects, and developmental problems, particularly for communities living near areas with frequent pesticide use.

I respectfully urge the Board of Supervisors to support this agenda item and move forward with a plan to phase out pesticide use in county waterways. Doing so will allow the County to identify the most effective, environmentally responsible, and sustainable path forward for managing waterways while protecting public health, wildlife, and water quality for future generations.

Sincerely,
Laura Freeman

Human exposure to certain pesticides has also been associated with serious health concerns, including cancer, neurological effects, and developmental problems, particularly for communities living near areas with frequent pesticide use.

I grew up going to the local beach and now that I have my daughter we love making a quick trip to Doheny to play in the sand and water. We also enjoy walking on the bike path along San Juan creek. Since we heard of all the pesticides going into the creek and flowing into Doheny we haven't been back. I'm not willing to risk my families health and expose them the cancer and other potential health issues.

I respectfully urge the Board of Supervisors to support this agenda item and move forward with a plan to phase out pesticide use in county waterways. Doing so will allow the County to identify the most effective, environmentally responsible, and sustainable path forward for managing waterways while protecting public health, wildlife, and water quality for future generations.

Sincerely,

Attention: This email originated from outside the County of Orange. Use caution when opening attachments or links.

Dear Members of the Orange County Board of Supervisors,

My name is Ashley and my family lives in San Juan Capistrano. We have 2 young children. I am writing in strong support of Agenda Item S10A, which includes directing the County to develop a formal plan to phase out herbicide use, requiring public notification of any herbicide application during the transition period, and other items that improve the accountability and compliance of the County with regulatory agencies. Pesticides and herbicides applied to waterways can harm or kill non-target organisms such as fish, amphibians, native plants, and aquatic invertebrates, disrupting food webs and degrading healthy ecosystems. Human exposure to certain pesticides has also been associated with serious health concerns, including cancer, neurological effects, and developmental problems, particularly for communities living near areas with frequent pesticide use.

My daughter is part of a nature school program that sits right on the creek in San Juan. The thought that these harmful pesticides could be affecting our children and communities is abhorrent and unacceptable. We also frequent Doheny state beach weekly and surf there weekly alongside hundreds if not thousands of other families.

Do we care about a perfectly manicured concrete riverbed more than we care about the environment and wellbeing of our residents?

I respectfully urge the Board of Supervisors to support this agenda item and move forward with a plan to phase out pesticide use in county waterways. Doing so will allow the County to identify the most effective, environmentally responsible, and sustainable path forward for managing waterways while protecting public health, wildlife, and water quality for future generations.

Regards,
Ashley Neelands

Orange County Board of Supervisors

RE: Agenda Item S10A – Support for a YES Vote

Dear Chair and Members of the Board of Supervisors,

I respectfully urge you to vote YES on Agenda Item S10A.

This item represents an important opportunity for Orange County to take a thoughtful and responsible approach toward modernizing vegetation management practices and evaluating alternatives to herbicide use. A YES vote does not predetermine an outcome; rather, it allows County staff the time and resources necessary to conduct the due diligence, research, and analysis needed to identify the most effective and environmentally responsible path forward.

Many counties throughout California, including Los Angeles County and San Diego County, have already begun modernizing their land management practices and exploring approaches that better align with the requirements and intent of the California Endangered Species Act (CESA) and the Federal Endangered Species Act (ESA). Orange County deserves the same opportunity to evaluate current practices, review emerging science, and consider alternatives that may better protect sensitive habitats, waterways, wildlife, and public health.

A YES vote on S10A is a vote for knowledge, transparency, science and informed decision-making. It gives our County the ability to fully examine the best available options, assess costs and benefits, and develop strategies that reflect modern environmental stewardship while continuing to meet operational needs.

Our residents deserve a County government that is willing to learn, adapt, and pursue continuous improvement. By supporting this item, you will empower staff to gather the information necessary to help Orange County do better and be better for future generations.

Thank you for your consideration and your service to our community.

Sincerely,
Joseph Pelleriti

Dear Members of the Orange County Board of Supervisors,

I am writing in strong support of Agenda Item S10A, which includes directing the County to develop a formal plan to phase out herbicide use, requiring public notification of any herbicide application during the transition period, and other items that improve the accountability and compliance of the County with regulatory agencies.

Pesticides and herbicides applied to waterways can harm or kill non-target organisms such as fish, amphibians, native plants, and aquatic invertebrates, disrupting food webs and degrading healthy ecosystems. Human exposure to certain pesticides has also been associated with serious health concerns, including cancer, neurological effects, and developmental problems, particularly for communities living near areas with frequent pesticide use.

After the recent Garden Grove chemical incident which displaced thousands of residents and raised concerns over the chemical's effects on our city's water, air, and ecosystems, it is now more important than ever to ensure that the people of Orange County are not exposed to chemicals that can cause serious health concerns. The people of Orange County deserve to be informed of these potential risks to their safety and to have a plan moving forward that prioritizes the community's health and quality of life.

I respectfully urge the Board of Supervisors to support this agenda item and move forward with a plan to phase out pesticide use in county waterways. Doing so will allow the County to identify the most effective, environmentally responsible, and sustainable path forward for managing waterways while protecting public health, wildlife, and water quality for future generations.

Sincerely,
Kelalani Luong-Kha

Dear Members of the Orange County Board of Supervisors,

I am writing in strong support of Agenda Item S10A, which includes directing the County to develop a formal plan to phase out herbicide use, requiring public notification of any herbicide application during the transition period, and other items that improve the accountability and compliance of the County with regulatory agencies.

Pesticides and herbicides applied to waterways can harm or kill non-target organisms such as fish, amphibians, native plants, and aquatic invertebrates, disrupting food webs and degrading healthy ecosystems. Human exposure to certain pesticides has also been associated with serious health concerns, including cancer, neurological effects, and developmental problems, particularly for communities living near areas with frequent pesticide use.

I respectfully urge the Board of Supervisors to support this agenda item and move forward with a plan to phase out pesticide use in county waterways. Doing so will allow the County to identify the most effective, environmentally responsible, and sustainable path forward for managing waterways while protecting public health, wildlife, and water quality for future generations.

Sincerely,

[Name]

Subject: Vote YES on Item S10A (Phasing Out Pesticide Use in County Waterways)

Attention: This email originated from outside the County of Orange. Use caution when opening attachments or links.

Dear Members of the Orange County Board of Supervisors,

My name is Haley Duran, and I am a resident of Santa Ana. I am writing in strong support of Agenda Item S10A, which would direct the County to develop a formal plan to phase out herbicide use, require public notification of herbicide applications during the transition period, and improve the County's accountability and compliance with regulatory agencies.

As someone who cares deeply about environmental health, community safety, and the protection of our local waterways, this issue feels personal to me. Orange County's rivers, creeks, and drainage channels are not separate from our communities. They connect to the places where people live, where families spend time outdoors, and where wildlife depends on clean and healthy ecosystems. When pesticides and herbicides are applied in or near waterways, they can harm fish, amphibians, native plants, aquatic invertebrates, and the larger food webs that depend on them.

I am also concerned about the potential health impacts for residents, especially communities that already face environmental burdens. Exposure to certain pesticides has been linked to serious health concerns, including cancer, neurological effects, and developmental problems. Communities living near areas with frequent pesticide use deserve transparency, protection, and a safer long-term approach.

I respectfully urge the Board of Supervisors to support Agenda Item S10A and move forward with a clear plan to phase out pesticide and herbicide use in county waterways. This is an opportunity for the County to choose a more responsible, sustainable path that protects public health, water quality, wildlife, and future generations.

Sincerely,
Haley Duran, Santa Ana, 92706

June 2026

Orange County Board of Supervisors

RE: Agenda Item S10A – Support for a YES Vote

Dear Chair and Members of the Board of Supervisors,

I respectfully urge you to vote YES on Agenda Item S10A.

This item represents an important opportunity for Orange County to take a thoughtful and responsible approach toward modernizing vegetation management practices and evaluating alternatives to herbicide use. A YES vote does not predetermine an outcome; rather, it allows County staff the time and resources necessary to conduct the due diligence, research, and analysis needed to identify the most effective and environmentally responsible path forward.

Many counties throughout California, including Los Angeles County and San Diego County, have already begun modernizing their land management practices and exploring approaches that better align with the requirements and intent of the California Endangered Species Act (CESA) and the Federal Endangered Species Act (ESA). Orange County deserves the same opportunity to evaluate current practices, review emerging science, and consider alternatives that may better protect sensitive habitats, waterways, wildlife, and public health.

A YES vote on S10A is a vote for knowledge, transparency, science and informed decision-making. It gives our County the ability to fully examine the best available options, assess costs and benefits, and develop strategies that reflect modern environmental stewardship while continuing to meet operational needs.

Our residents deserve a County government that is willing to learn, adapt, and pursue continuous improvement. By supporting this item, you will empower staff to gather the information necessary to help Orange County do better and be better for future generations.

Thank you for your consideration and your service to our community.

Sincerely,
Jason Khan

Dear [Name],

I am writing to you today to express my appreciation for your support of the Lake Forest Creek Team. Your contribution has made a significant difference in our ability to protect and improve the local waterways.

Your support is essential to our mission of maintaining the health of our creeks and the communities that depend on them. We are grateful for your commitment to environmental stewardship.

We will continue to work hard to ensure that our creeks remain clean and healthy for generations to come. Your support is a vital part of our success, and we look forward to your continued involvement.

Thank you for your support of the Lake Forest Creek Team. We are proud to have you as a member of our community.

If you have any questions or would like to learn more about our work, please contact us at [Phone Number] or [Email Address]. We are always happy to hear from our supporters.

Sincerely,

Orange County Board of Supervisors

RE: Agenda Item S10A – Support for a YES Vote

Dear Chair and Members of the Board of Supervisors,

I respectfully urge you to vote YES on Agenda Item S10A.

This item represents an important opportunity for Orange County to take a thoughtful and responsible approach toward modernizing vegetation management practices and evaluating alternatives to herbicide use. A YES vote does not predetermine an outcome; rather, it allows County staff the time and resources necessary to conduct the due diligence, research, and analysis needed to identify the most effective and environmentally responsible path forward.

Many counties throughout California, including Los Angeles County and San Diego County, have already begun modernizing their land management practices and exploring approaches that better align with the requirements and intent of the California Endangered Species Act (CESA) and the Federal Endangered Species Act (ESA). Orange County deserves the same opportunity to evaluate current practices, review emerging science, and consider alternatives that may better protect sensitive habitats, waterways, wildlife, and public health.

A YES vote on S10A is a vote for knowledge, transparency, science and informed decision-making. It gives our County the ability to fully examine the best available options, assess costs and benefits, and develop strategies that reflect modern environmental stewardship while continuing to meet operational needs.

Our residents deserve a County government that is willing to learn, adapt, and pursue continuous improvement. By supporting this item, you will empower staff to gather the information necessary to help Orange County do better and be better for future generations.

Thank you for your consideration and your service to our community.

Sincerely,
Joe Krolick

Subject: Vote YES on Item S10A (Phasing Out Pesticide Use in County Waterways)

Attention: This email originated from outside the County of Orange. Use caution when opening attachments or links.

Dear Members of the Orange County Board of Supervisors,

I am writing in strong support of Agenda Item S10A, which includes directing the County to develop a formal plan to phase out herbicide use, requiring public notification of any herbicide application during the transition period, and other items that improve the accountability and compliance of the County with regulatory agencies.

Pesticides and herbicides applied to waterways can harm or kill non-target organisms such as fish, amphibians, native plants, and aquatic invertebrates, disrupting food webs and degrading healthy ecosystems. Human exposure to certain pesticides has also been associated with serious health concerns, including cancer, neurological effects, and developmental problems, particularly for communities living near areas with frequent pesticide use.

I respectfully urge the Board of Supervisors to support this agenda item and move forward with a plan to phase out pesticide use in county waterways. Doing so will allow the County to identify the most effective, environmentally responsible, and sustainable path forward for managing waterways while protecting public health, wildlife, and water quality for future generations.

Sincerely,
